

Smart Scheduler

for eoSight

Anritsu
Advancing beyond

Executive Summary

“

Smart Scheduler addresses the critical challenges of report management, enhancing operational efficiency, data security, and report accessibility.

”

Smart Scheduler for eoSight automates report scheduling, export and distribution while enhancing data security, collaboration, and ensuring flexible delivery options tailored to diverse organizational needs.

Automated KPI Reporting

Generate management or operational reports with custom filters on an easily-automated schedule.

Multi-format Support

Choose to share exports by email or SFTP in a suitable medium:

- PDF
- XLS
- CSV
- PPT

Security By Design

Role-based access and password-protected files ensure report availability only to authorised recipients. Supports SSH keys and LDAP authentication.

Easy Scheduling Options

Produce reports according to your custom requirements with support for daily, weekly and custom schedules.

Dynamic Filters

Filter report output according to the exact requirements of the recipients.

Solution Overview

Smart Scheduler for eoSight is a tool designed to optimise report scheduling and export processes within the Anritsu solution environment. Seamlessly integrated into the eoSight ecosystem, it addresses the critical challenges of report management, enhancing operational efficiency, data security, and report accessibility.

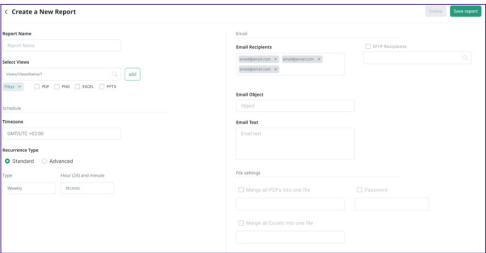

Automated Reporting Workflows

Smart Scheduler simplifies report generation with its advanced scheduling capabilities. Reports can be configured to generate on demand or at recurring intervals—daily, weekly, or custom—offering complete flexibility. This automation reduces manual intervention, minimising errors and freeing up valuable resources for more strategic tasks.

Multi-Format Export Options

Smart Scheduler supports a diverse range of output formats, including CSV, Excel, PDF, and PowerPoint. Organisations can tailor reports to their specific needs, ensuring stakeholders receive data in the format most suitable for their workflows.

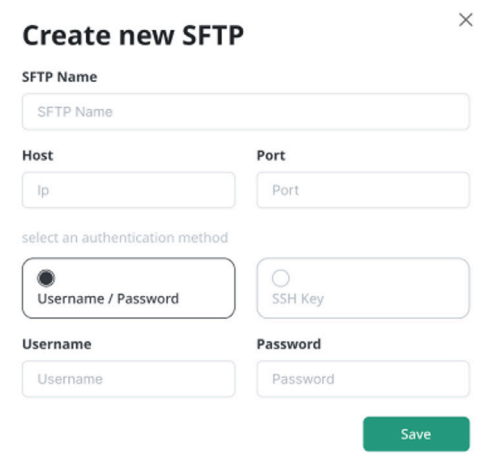

Dynamic Filtering for Personalised Insights

Leveraging integration with complex eoSight filters, Smart Scheduler allows users to easily customise report content dynamically. This feature ensures that recipients view only the most relevant data, improving decision-making and collaboration.

Secure and Flexible Delivery

With multiple delivery methods, such as email and SFTP forwarding, it ensures that reports reach the right audience securely. Features like password-protected files, SSH key support, and LDAP-based user authentication enhance data security, making it suitable for handling sensitive information.

Role-Based Access Control

Smart Scheduler includes robust user role management, differentiating between administrative and expert users. This layered access system ensures that report generation and distribution are aligned with organisational security policies.

Operational Reliability

The platform's built-in mechanisms for retrying and recovering failed exports guarantee dependable performance. This reliability is critical for high-volume data environments where uninterrupted report delivery is essential.
